ОГСЭ.03 Иностранный язык в профессиональной
деятельности

по специальности

09.02.06 Сетевое и системное администрирование

Очная форма обучения

Владивосток 2020

Рабочая программа учебной дисциплины ОГСЭ.03 «Иностранный язык в профессиональной деятельности» разработана в соответствии с требованиями Федерального государственного образовательного стандарта среднего профессионального образования по специальности 09.02.06 Сетевое и системное администрирование, утверждённого приказом Минобрнауки России 09 декабря 2016 г. № 1548, примерной образовательной программой.

Разработана:

Марфина И.В. – преподаватель Колледжа сервиса и дизайна

Израелян Т.И., преподаватель колледжа сервиса и дизайна ВГУЭС

Рассмотрена на заседании ЦМК дисциплин общеобразовательного учебного цикла
Протокол № 9 от «14» мая 2020 г.
Председатель ЦМК Шаповалова Шаповалова О.А.

СОДЕРЖАНИЕ

- 1. ОБЩАЯ ХАРАКТЕРИСТИКА ПРОГРАММЫ УЧЕБНОЙ ДИСЦИПЛИНЫ**
- 2. СТРУКТУРА И СОДЕРЖАНИЕ УЧЕБНОЙ ДИСЦИПЛИНЫ**
- 3. УСЛОВИЯ РЕАЛИЗАЦИИ УЧЕБНОЙ ДИСЦИПЛИНЫ**
- 4. КОНТРОЛЬ И ОЦЕНКА РЕЗУЛЬТАТОВ ОСВОЕНИЯ УЧЕБНОЙ ДИСЦИПЛИНЫ**

1. ОБЩАЯ ХАРАКТЕРИСТИКА ПРОГРАММЫ УЧЕБНОЙ ДИСЦИПЛИНЫ

1.1. Место дисциплины в структуре основной профессиональной образовательной программы: дисциплина «Английский язык в профессиональной деятельности» входит в общий гуманитарный и социально-экономический цикл (ОГСЭ)

1.2 Требования к результатам освоения учебной дисциплины

Цель и планируемые результаты освоения дисциплины:

| Код компетенции | Знания | Умения |
|--|--|--|
| <i>ОК 01 ОК 04 ОК 06 ОК 10</i> | правила построения простых и сложных предложений на профессиональные темы; основные общеупотребительные глаголы (бытовая и профессиональная лексика); лексический минимум, относящийся к описанию предметов, средств и процессов профессиональной деятельности; особенности произношения; правила чтения текстов профессиональной направленности | понимать общий смысл четко произнесенных высказываний на известные темы (профессиональные и бытовые), понимать тексты на базовые профессиональные темы участвовать в диалогах на знакомые общие и профессиональные темы строить простые высказывания о себе и о своей профессиональной деятельности кратко обосновывать и объяснить свои действия (текущие и планируемые) писать простые связные сообщения на знакомые или интересующие профессиональные темы. правила построения простых и сложных предложений на профессиональные темы |

2. СТРУКТУРА И СОДЕРЖАНИЕ УЧЕБНОЙ ДИСЦИПЛИНЫ «ОГСЭ.03 ИНОСТРАННЫЙ ЯЗЫК В ПРОФЕССИОНАЛЬНОЙ ДЕЯТЕЛЬНОСТИ»

2.1. Объем учебной дисциплины и виды учебной работы

| Вид учебной работы | Объем в часах |
|--|--------------------------|
| Объем образовательной программы | 188 |
| в том числе: | |
| теоретическое обучение | 4 |
| практические занятия | 172 |
| <i>Самостоятельная работа</i> | 12 |
| Промежуточная аттестация | Дифференцированный зачет |

2.2. Тематический план и содержание учебной дисциплины

| Наименование разделов и тем | Содержание учебного материала, лабораторные и практические работы, самостоятельная работа обучающихся | Объем часов | Уровень освоения | |
|---|--|-------------|------------------|---|
| 1 | 2 | 3 | 4 | |
| Раздел 1. Вводно-коррективный курс | | 24 | | |
| Тема 1.1. Описание людей: друзей, родных и близких и т.д.(внешность, характер, личностные качества) | Содержание учебного материала Практические занятия | 8 | | |
| | 1. Введение. Входной контроль, тест | | 2 | |
| | 2. Фонетический материал - совершенствование орфографических навыков. | | 2 | |
| | 3. Лексический материал по теме. - понятие глагола-связки | | 2 | |
| | 4. Грамматический материал: - простые нераспространенные предложения с глагольным, составным именным и составным глагольным сказуемым (с инфинитивом); - простые предложения, распространенные за счет однородных членов предложения и/или второстепенных членов предложения; - предложения утвердительные, вопросительные, отрицательные, побудительные и порядок слов в них; - безличные предложения;. | | 2 | |
| | Теоретическое обучение | | 4 | |
| | 1. Лексический материал по теме: - основные способы написания слов на основе знания правил правописания | | | 2 |
| 2. Фонетический материал по теме: - основные звуки и интонаемы английского языка. | | 2 | | |
| Тема 1.2. Межличностные отношения дома, в учебном заведении, на работе. Повседневная жизнь, условия жизни, учебный день, выходной день | Содержание учебного материала Практические занятия | 12 | | |
| | 1. Лексический материал по теме: - расширение потенциального словаря за счет овладения интернациональной лексикой, новыми значениями известных слов и новых слов, образованных на основе продуктивных способов словообразования | | | 2 |
| | 1. Грамматический материал: - модальные глаголы, их эквиваленты; - предложения с оборотом there is/are; | | | 2 |

| | | | |
|---------------------------|---|------------|---|
| | - сложносочиненные предложения: бессоюзные и с союзами and, but. - образование и употребление глаголов в Present, Past, Future Simple/Indefinite | | |
| | 2. Лексический материал по теме: - расширение потенциального словаря | | 2 |
| | 3. Грамматический материал: - имя существительное: его основные функции в предложении; имена существительные во множественном числе, образованные по правилу, а также исключения. - артикль: определенный, неопределенный, нулевой. Основные случаи употребления определенного и неопределенного артикля. Употребление существительных без артикля. | | 2 |
| | 4. Грамматический материал: - числительные; - система модальности.; - образование и употребление глаголов в Past, Future Simple/Indefinite. | | 2 |
| | 5. Контрольная работа по грамматическому материалу | | 2 |
| Раздел 2. | | 164 | |
| Тема2.1 PERSONAL COMPUTER | Содержание учебного материала Практические занятия | 14 | |
| | 1. What is a Computer | | 2 |
| | 2. What is a Computer | | 2 |
| | 3. A Computer System Грамматика и лексика: временные формы глагола; глагол to be с инфинитивом; оборот to be + of + существительное; существительное в функции определения; числительные | | 2 |
| | 4. Graphical User Interface (GUI) | | 2 |
| | 5. Graphical User Interface (GUI) | | 2 |
| | 6. What does My Computer do When I Switch it on | | 2 |
| | 7. What does My Computer do When I Switch it on | | 2 |
| | Самостоятельная работа Портфолио или учебно-контрольный файл обучающегося. | 2 | |
| Тема 2.2 PC SOFTWARE | Содержание учебного материала Практические занятия | 12 | |

| | | | |
|--|---|-----------|---|
| | 1. Bill Gates | | 2 |
| | 2. IBM | | 2 |
| | 3. Business World – Company of the Month: Microsoft Грамматика и лексика: причастие I, II; слова some, the same; значения слова as и сочетаний с ним; степени сравнения прилагательных и наречий, сравнительные конструкции | | 2 |
| | 4. General Features Of Operating Systems | | 2 |
| | 5. General Features Of Operating Systems | | 2 |
| | 6. Windows 2000 | | 2 |
| Тема 2.3 COMPUTER APPLICATIONS | Содержание учебного материала Практические занятия | 12 | |
| | 1. Robots and Androids | | 2 |
| | 2. Virtual Reality | | 2 |
| | 3. Virtual Reality Грамматика и лексика: причастие II в постпозиции; глаголы, выражающие долженствование; временные формы глаголов и причастий I и II | | 2 |
| | 4. Computer Games | | 2 |
| | 5. Music For An Electronic Generation | | 2 |
| | 6. Revision | | 2 |
| Тема 2.4 FROM THE HISTORY OF COMPUTERS | Содержание учебного материала Практические занятия | 10 | |
| | 1. From The History Of Computers | | 2 |
| | 2. From The History Of Computers | | 2 |
| | 3. First Electronic Computer | | 2 |
| | 4. First Electronic Computer | | 2 |
| | 5. Computer Mouse Грамматика и лексика: ; временные формы глаголов и причастий I и II; бессоюзное присоединение определительных придаточных предложений | | 2 |
| | 6. Revision | | |
| | Самостоятельная работа-Catherine Bull Investigates This Week: Software | 2 | |
| Тема 2.5 MODERN MEANS OF COMMUNICATION | Содержание учебного материала Практические занятия | 10 | |
| | 1. E-Mail, Telephones And The Post | | 2 |
| | 2. Mobiles — Useful Or Dangerous? | | 2 |

| | | | |
|---------------------------------|---|-----------|---|
| | 3. Mobile Phones Грамматика и лексика: инфинитив в функции подлежащего, обстоятельств цели и следствия; оборот «for + существительное + инфинитив»; значения слов one, it | | 2 |
| | 4. Computers In The Office | | 2 |
| | 5. Computers In The Office | | 2 |
| Тема 2.6 INTERNET ISSUES | Содержание учебного материала Практические занятия | 12 | |
| | 1. The Internet: FAQs (Frequently Asked Questions) | | 2 |
| | 2. The Pros and Cons of Using the Internet | | 2 |
| | 3. The Pros and Cons of Using the Internet | | 2 |
| | 4. Online Services | | 2 |
| | 5. Interactivity | | 2 |
| | 6. Interactivity Грамматика и лексика: сложное дополнение; значения слов и сочетаний due, which | | 2 |
| Тема 2.7 NETIQUETTE | Содержание учебного материала Практические занятия | 10 | |
| | 1. Netiquette | | 2 |
| | 2. E-Mail | | 2 |

ОГСЭ. 03 Иностранный язык в профессиональной
деятельности

программы подготовки специалистов среднего звена
09.02.06 Сетевое и системное администрирование

Форма обучения: очная

Владивосток 2020

Контрольно-оценочные средства для проведения текущего контроля и промежуточной аттестации по учебной дисциплине ОГСЭ.03 «Иностранный язык в профессиональной деятельности» разработана в соответствии с требованиями ФГОС СПО по специальности 09.02.06.Сетевое и системное администрирование, утвержденного приказом Минобрнауки РФ от 09.12.2016, №1548, примерной образовательной программой, рабочей программой учебной дисциплины.

Разработана:

Израелян Т.И. – преподаватель Колледжа сервиса и дизайна

Марфина И.В. – преподаватель Колледжа сервиса и дизайна

Рассмотрена на заседании ЦМК дисциплин общеобразовательного учебного цикла

Протокол № 9 от «14» мая 2020 г.

Председатель ЦМК Шаповалова Шаповалова О.А.

1 Общие сведения

Комплекс оценочных средств (КОС) предназначен для контроля и оценки образовательных достижений обучающихся, освоивших программу учебной дисциплины ОГСЭ.03 Иностранный язык в профессиональной деятельности

Формой аттестации по учебной дисциплине является экзамен.

КОС разработаны на основании:

– ФГОС СПО по специальности 09.02.06 Сетевое и системное администрирование;

– основной образовательной программы по специальности 09.02.06 Сетевое и системное администрирование

– программы учебной дисциплины ОГСЭ.03 Иностранный язык в профессиональной деятельности.

Формой промежуточной аттестации является дифференцированный зачет.

| Код ОК, ПК | Код результата обучения | Наименование |
|--|-------------------------|--|
| ОК 01 ОК 04 ОК 06 ОК 10 | У 1 | понимать общий смысл четко произнесенных высказываний на известные темы (профессиональные и бытовые), |
| | У2 | переводить (со словарем) иностранные тексты профессиональной направленности |
| | У3 | самостоятельно совершенствовать устную и письменную речь, пополнять словарный запас |
| | З1 | лексический (1200 - 1400 лексических единиц) и грамматический минимум, необходимый для чтения и перевода (со словарем) иностранных текстов профессиональной направленности |

- a) must c) can
 b) had d) may
15. That was great! It was ... meal you have ever cooked.
 a) good c) best
 b) better d) the best
16. This exhibition is ... interesting than the previous one.
 a) little c) least
 b) less d) the least
17. We saw ... good film last night. The film was about the love of a girl to her cat and dog.
 a) a c) -
 b) the d) an
18. Everybody agrees that ... happiness is very important in the life of people.
 a) - c) a
 b) the d) many
19. In the past people lived in ... harmony with the environment.
 a) a c) the
 b) an d) -
20. When they arrived ... the station, they rushed to the platform not to miss the train.
 a) to c) in
 b) at d) for

Test 2

Choose the right variant.

1. When you ... older, you'll change your mind about this.
 a) will grow c) have grown
 b) grow d) grew
2. By the time the police get there, the burglars
 a) vanish c) will have vanished
 b) will vanish d) vanished
3. As soon as the taxi arrives, I ... you know.
 a) let c) had let
 b) have let d) will let
4. My friend has been writing to me for years already, but he never ... a photo.
 a) sends c) will send
 b) has sent d) sent
5. Why are you busy packing? - My train ... in two hours, so we'll leave the house in an hour.
 a) is leaving c) leaves
 b) will be leaving d) left
6. When was this building finished? - They say it ... by the end of last year.
 a) had been finished c) will be finished
 b) was finished d) finishes
7. I thought that I ... my key and was very glad when I found it.
 a) lose c) had lost
 b) lost d) was losing
8. What's the matter? You look upset. Last week I lost my scarf and now I just ... my gloves.
 a) lost c) had lost
 b) have lost d) lose
9. I ... for this bank for five years already but I have decided to change my job.
 a) am working c) have been working
 b) has worked d) worked

- b) were searched d) searched
6. There is going to be a big art exhibition. It... a lot of visitors.
a) attracts c) has attracted
b) will attract d) attracted
7. The result of his investigation ... in the newspaper soon.
a) publish c) will be published
b) be published d) is published
8. When they arrived home, their children ... outside the door waiting for them.
a) sit c) was sitting
b) are sitting d) were sitting
9. We ... a new computer not long ago. Now the job will be done much more quickly.
a) had bought c) bought
b) was bought d) have bought
10. He was sorry that he ... to me for so long.
a) didn't write c) hadn't been writing
b) haven't been writing d) hasn't been writing
11. The ring you found ... be returned to an old lady who had lost it.
a) can c) have to
b) must d) are to
12. Everybody in our team played ... except the captain.
a) bad c) worst
b) badly d) the worst
13. You know much, but you know ... than your teacher.
a) little c) least
b) less d) much
14. Small shops are not as ... as supermarkets.
a) more convenient c) most convenient
b) convenient d) the most convenient
15. Sarah is a very good pianist. She plays ... piano very well.
a) a c) the
b)an d)-
16. We had five phone calls, but there were ... for you.
a) no c) either
b) none d) neither
17. I didn't have much time, but I ... visit a lot of places of interest in London.
a) can c) must
b) was able to d) had to
18. That's an easy question! ... knows the answer!
a) All c) Each
b) Everybody d) Every
19. The comic told silly jokes, but nobody laughed ... him.
a) on c) at
b) under d)about
20. We feel sorry ... Sam because he hasn't got any friends.
a) for c) with
b)about d) by

Test 4

Choose the right variant.

1. If I ... some fish, will you cook it for me?

- a) will catch c) caught
b) catch d) am catching
2. She said that she ... her present flat. She tried to find another one.
a) doesn't like c) didn't like
b) won't like d) likes
3. I saw you yesterday from the bus. Where ... you ... at that time?
a) was hurrying c) had hurried
b) were hurrying d) did hurry
4. I found that everything I said on the phone ... to the police.
a) report c) was reported
b) is reported d) had been reported
5. When I speak Italian, all the others in the class ... at me as I don't know the language well.
a) laughed c) will laugh
b) was laughing d) laugh
6. He ... in the Army for eighteen months. This is his last month.
a) serves c) has been serving
b) is serving d) have served
7. Don't make noise: the children ... to sleep.
a) try c) will try
b) is trying d) are trying
8. A new museum ... in the city. What a beautiful building it will be!
a) was being built c) is built
b) is being built d) builds
9. Two terrorists ... in New York some days ago.
a) are arrested c) were arrested
b) have been arrested d) will be arrested
10. I ... understand this letter. Will you translate it for me?
a) mustn't c) may not
b) can't d) shouldn't
11. Diana's parents don't let her go to late-night disco. She ... be at home at 9 o'clock in the evening.
a) must c) may
b) can d) have to
12. Henry ... apologize for his bad behaviour yesterday.
a) have to c) had to
b) may d) is to
13. The children studied hard, and as a result they passed the exams ... of all.
a) good c) best
b) better d) the best
14. This is ... film I've ever seen.
a) more interesting c) most interesting
b) the most interesting d) not interesting
15. ... old, ... sick, ... unemployed need our special care.
a) - c) the
b) an d) everybody
16. Someone who saw ... robbery called the-police.
a) - c) the
b) a d) those
17. According to this song ... we need is love.

- a) have been sitting c) sat
 b) were sitting d) had been sitting
14. We were disappointed as the film was ... than we expected.
 a) entertaining c) most entertaining
 b) less entertaining d) entertaining
15. We usually ask our teacher to explain ... difficult problems to us.
 a) the c) a
 b) - d) this
16. Playing ... guitar is an interesting hobby.
 a) - c) the
 b) a d) mine
17. Our city is famous for ... beautiful ancient buildings.
 a) its c) it's
 b) it d) his
18. Her hair is long and fair. Everybody admires
 a) them c) they
 b) it d) its
19. You are very good ... dealing with people.
 a) in c) on
 b) at d) about
20. Last summer our neighbours decided to drive to Scotland ... a short holiday.
 a) at c) on
 b) to d) for

Test 6

Choose the right variant.

1. When the light ... I was sitting in the armchair reading a book.
 a) goes out c) go out
 b) had gone out d) went out
2. I thought I ... this film before, but I hadn't.
 a) saw c) had seen
 b) seen d) have seen
3. Why haven't you brought me the letters for signature? ... them yet?
 a) Don't you type c) Haven't you typed
 b) Didn't you type d) Will you type
4. She wasn't sure whether she ... the door of her flat.
 a) locked c) had locked
 b) has locked d) didn't lock
5. I... my homework all morning and haven't finished it yet.
 a) am doing c) have been doing
 b) do d) did
6. The inspector suspected that the thief ... a special key for opening this door.
 a) uses c) had used
 b) has used d) will use
7. I was very tired. When I ... to bed, I fell asleep immediately.
 a) got c) had got
 b) has got d) will get
8. The Vikings ... to North America a thousand years ago.
 a) sail c) had sailed
 b) sailed d) have sailed

9. Thank you for your offer, but I ... not to accept it.
 a) decide c) have decided
 b) has decided d) decided
10. You ... through your old photograph album for half an hour already.
 a) look c) have looked
 b) are looking d) have been looking
11. Nobody knows where his picture is. Perhaps, it
 a) was stolen c) has been stolen
 b) will be stolen d) stolen
12. I agree. You ... apologize for not inviting him to your birthday party.
 a) can't c) shouldn't
 b) mustn't d) may not
13. Actually, today I feel ... than I did yesterday.
 a) bad c) worst
 b) worse d) the worst
14. ... people who are unemployed often feel depressed.
 a) The c) A
 b) - d) That
15. Who was the first astronaut who landed on ... Moon?
 a) the c) a
 b) - d) those
16. What happened at the end of the film? - I'm sorry to say, but I haven't seen ... film.
 a) a c) -
 b) the d) those
17. This is ... interesting exhibition I've ever visited.
 a) more c) less
 b) most d) the most
18. Would you mind waiting ... minutes?
 a) few c) little
 b) a few d) a little
19. I'm ... interested in languages than in mathematics,
 a) much c) little
 b) many d) less
20. The students often translate English texts ... Russian.
 a) to c) into
 b) in d) on

Test 7

Choose the right variant.

1. My mother ... strawberries for years but she has never had such a good crop before.
 a) grow c) has been growing
 b) grew d) had grown
2. Helen got off the bus and walked into the bank when she realized that she ... her handbag on the bus.
 a) left c) has left
 b) had left d) leaves
3. You are a great cook! This cake ... wonderful as usual.
 a) taste c) will taste
 b) tasted d) tastes
4. I cut my finger when I ... the potatoes.
 a) am peeling c) was peeling

- b) have peeled d) will peel
5. The students ... not to be late for their classes.
a) ask c) are asked
b) asked d) are asking
6. Yesterday, while Jane ... she broke two cups.
a) wash up c) was washing up
b) washes up d) has washed up

a)- c)A
b) The d) This
16. The government should help ... poor.
a) - c) a
b) the d)that
17. You can do ... you want, but don't bother me now.
a) anything c) some
b) something d) any
18. The government is going to provide ... houses for homeless people.
a) much c) most
b) more d) least
19. I think of coming to Moscow ... a few days to visit my sister.
a) of c) for
b)on d)over
20. I think we should ask ... some information about this case.
a) about c) for
b) - d) on

Test 8

Choose the right variant.1

1. The train stopped at all the stations, and long before we got to London every seat ... and people were standing in the corridors.
a) has been taken c) had been taken
b) was taken d) is taken
2. Most of the young people left this village a long time ago and nobody ... yet.
a) returned c) had returned
b) has returned d) was returned
3. The police suspected that Bill himself had broken the window at his house because he wanted to make them think that a burglar ... his valuable stamp collection.
a) stole c) was stealing
b) had stolen d) has stolen
4. The police thought that he ... it because he needed money.
a) did c) was doing
b) had done d) has done
5. If you work a bit harder, I'm sure you ... the exam.
a) pass c) have passed
b) will pass d) would pass
6. Where are you going? I ... speaking with you yet.
a) not finished c) haven't finished
b) didn't finish d) don't finish
7. I didn't see where the bus stop was, so I ... the bus yesterday.
a) miss c) has missed
b) missed d) had missed
8. Last week a burglar broke into the house while we ... television.
a) watch c) watched
b) have watched d) were watching
9. When are you going to finish this translation? - I ... this translation today.
a) finish c) have finished
b) finished d) had finished
10. I felt really tired. We ... for two hours before we reached the nearest hotel.
a) walked c) have been walking
b) were walking d) had been walking
11. My father is sure that most people ... bicycles to work in twenty years' time.
a) shall ride c) ride
b) will be riding d) are riding
12. The plane ... take off after the fog had lifted.
a) must c) can
b) was able to d) may
13. Finally we ... stop: we were tired and it was dark.
a) can c) must
b) may d) had to
14. In the past most of the population lived in ... country.
a) the c) -
b) a d) this
15. The judge sent our neighbor to ... prison for a month.
a) the c) -
b) a d) an
16. ... English are proud of their country and that the English language is spoken all over the world.

- b) bought d) had been bought
12. He was happy. He ... pass his driving test at the first attempt.
- a) should c) had to
- b) must d) was able to
13. At present I ... afford to go to the cinema twice a week.
- a) can't c) must not
- b) couldn't d) might not
14. We didn't think you were ... in ancient history.
- a) interested c) not interesting
- b) interesting d) less interesting
15. Every morning I listen to ... radio, but I don't like to watch TV so early.
- a) the c) -
- b) a d) these
16. ... English is the world language and the English language spoken in the USA or Australia differs from the English language spoken in Britain.
- a)the c) an
- b) - d)a
17. You are always quarreling! Stop it, ... of you!
- a)everybody c) both
- b) some d) every
18. Mr. Smith was accused of spying and put ... prison.
- a) in c) at
- b) of d) to
19. Our city succeeded ... collecting a large sum of money for charity.
- a) on c) with
- b) in d) at
20. I'm sorry ... your difficulties. Can I help?
- a)for c) about
- b) at d)on

Test 10

Choose the right variant.

1. It's 11 o'clock so I ... to bed now.
- a) go c) will go
- b) am going d) have gone
2. The tickets to the football match usually ... and checked at the entrance.
- a) sell c) are sold
- b) was sold d) won't be sold
3. We ... to the party today.
- a) have been invited c) have invited
- b) are invited d) had been invited
4. The baby ... because it is hungry now.
- a) crying c) cries
- b) is crying d) cried
5. There ... a lot of people waiting in the station yesterday evening.
- a) is c) was
- b) are d) were
6. Some people ... on the benches waiting for their trains.
- a) was sleeping c) have slept
- b) were sleeping d) had slept

7. By the time the train arrived, Susan ... to push her way to the front of the crowd.
 a) managed c) had managed
 b) has managed d) would manage
8. ... you ... my English book anywhere? I can find it nowhere.
 a) Did ... see c) Will ... see
 b) Have ... seen d) Had ... seen
9. He ... the text before I decided to help him.
 a) translated c) has translated
 b) had translated d) will translate
10. It ... in London this morning that the British Oil Corporation had discovered oil under the sea near the Welsh coast.
 a) announced c) had been announced
 b) would be announced d) was announced
11. If he ... when I come, I won't wake him up.
 a) sleep c) will sleep
 b) will be sleeping d) is sleeping
12. ... they leave before supper or have they time to stay until my friends come?
 a) must c) might
 b) may d) should
13. My ... brother studies at college.
 a) old c) older
 b) elder d) the eldest
14. This is ...film I have ever seen.
 a) good c) worse
 b) the best d) better
15. ... Hyde Park is a very large park in central London.
 a) - c) a
 b) the d) an
16. My friends tell me that professors are people who think a lot, but say
 a) little c) a few
 b) few d) some
17. These books cost ... than my friend wants to pay.
 a) more c) most
 b) much d) the most
18. He has earned so ... money that he has decided to help the poor.
 a) much c) little
 b) many d) few
19. They go to work by car and come home ... foot.
 a) by c) with
 b) on d) in
20. The bus from Glasgow arrives ... the Central bus station.
 a) at c) in
 b) to d) for

Критерии оценки

- оценка «отлично» выставляется обучающемуся, если студент выполнил задание от 91% до 100%
- оценка «хорошо», если студент выполнил задание от 70% до 90%
- оценка «удовлетворительно», если студент выполнил задание от 50% до 69%
- оценка «неудовлетворительно», если студент выполнил задание менее 50%

Task 1

This is the summary of the section. Render it in English

Computers

Generally, any device that can perform numerical calculations, even an adding machine, may be called a computer but nowadays this term is used especially for digital computers. Computers that once weighed 30 tons now may weigh as little as 1.8 kilograms. Microchips and microprocessors have considerably reduced the cost of the electronic components required in a computer. Computers come in many sizes and shapes such as special-purpose, laptop, desktop, minicomputers, supercomputers.

Special-purpose computers can perform specific tasks and their operations are limited to the programmes built into their microchips. These computers are the basis for electronic calculators and can be found in thousands of electronic products, including digital watches and automobiles. Basically, these computers do the ordinary arithmetic operations such as addition, subtraction, multiplication and division.

General-purpose computers are much more powerful because they can accept new sets of instructions. The smallest fully functional computers are called laptop computers. Most of the general-purpose computers known as personal or desktop computers can perform almost 5 million operations per second.

Today's personal computers are known to be used for different purposes: for testing new theories or models that cannot be examined with experiments, as valuable educational tools due to various encyclopedias, dictionaries, educational programmes, in book-keeping, accounting and management. Proper application of computing equipment in different industries is likely to result in proper management, effective distribution of materials and resources, more efficient production and trade.

Minicomputers are high-speed computers that have greater data manipulating capabilities than personal computers do and that can be used simultaneously by many users. These machines are primarily used by larger businesses or by large research and university centers. The speed and power of supercomputers, the highest class of computers, are almost beyond comprehension, and their capabilities are continually being improved. The most complex of these machines can perform nearly 32 billion calculations per second and store 1 billion characters in memory at one time, and can do in one hour what a desktop computer would take 40 years to do. They are used commonly by government agencies and large research centers. Linking together networks of several small computer centers and programming them to use a common language has enabled engineers to create the supercomputer. The aim of this technology is to elaborate a machine that could perform a trillion calculations per second.

1. What are the main types of computers?
2. How do the computers differ in size and methods of their application?
3. What are the main trends in the development of the computer technology?

Task 2

This is the summary of the section. Render it in English

Digital computers

There are two fundamentally different types of computers: analog and digital. The former type solves problems by using continuously changing data such as voltage. In current usage, the term "computer" usually refers to high-speed digital computers. These computers are playing an increasing role in all branches of the economy.

Digital computers based on manipulating discrete binary digits (1s and 0s). They are generally more effective than analog computers for four principal reasons: they are faster; they are not so susceptible to signal interference; they can transfer huge data bases more accurately; and their coded binary data are easier to store and retrieve than the analog signals.

For all their apparent complexity, digital computers are considered to be simple machines. Digital computers are able to recognize only two states in each of its millions of switches, "on" or "off", or high voltage or low voltage. By assigning binary numbers to these states, 1 for "on" and 0 for "off", and linking many switches together, a computer can represent any type of data from numbers to letters and musical notes. It is this process of recognizing signals that is known as digitization. The real power of a computer depends on the speed with which it checks switches per second. The more switches a computer checks in each cycle, the more data it can recognize at one time and the faster it can operate, each switch being called a binary digit or bit.

A digital computer is a complex system of four functionally different elements: 1) the central processing unit (CPU), 2) input devices, 3) memory-storage devices called disk drives, 4) output devices. These physical parts and all their physical components are called hardware.

The power of computers greatly on the characteristics of memory-storage devices. Most digital computers store data both internally, in what is called main memory, and externally, on

auxiliary storage units. As a computer processes data and instructions, it temporarily stores information internally on special memory microchips. Auxiliary storage units supplement the main memory when programmes are too large and they also offer a more reliable method for storing data. There exist different kinds of auxiliary storage devices, removable magnetic disks being the most widely used. They can store up to 100 megabytes of data on one disk, a byte being known as the basic unit of data storage.

Output devices let the user see the results of the computer's data processing. Being the most commonly used output device, the monitor accepts video signals from a computer and shows different kinds of information such as text, formulas and graphics on its screen. With the help of various printers information stored in one of the computer's memory systems can be easily printed on paper in a desired number of copies.

Programmes, also called software, are detailed sequences of instructions that direct the computer hardware to perform useful operations. Due to a computer's operating system hardware and software systems can work simultaneously. An operating system consists of a number of programmes coordinating operations, translating the data from different input and output devices, regulating data storage in memory, transferring tasks to different processors, and providing functions that help programmers to write software. In large corporations software is often written by groups of experienced programmers, each person focusing on a specific aspect of the total project. For this reason, scientific and industrial software sometimes costs much more than do the computers on which the programmes run.

Task 3

This is the summary of the section. Render it in English

Prehistory

(1) Tools are any objects other than the parts of our own bodies that we use to help us do our work. Technology is nothing more than the use of tools. When you use a screwdriver, a hammer, or an axe, you are using technology just as much as when you use an automobile, a television set, or a computer.

(2) We tend to think of technology as a human invention. But the reverse is closer to the truth. Stone tools found along with fossils show that our ape-like ancestors were already putting technology to use. Anthropologists speculate that using tools may have helped these creatures evolve into human beings; in a tool-using society, manual dexterity and intelligence count for more than brute strength. The clever rather than the strong inherited the earth.

(3) Most of the tools we have invented have aided our bodies rather than our minds. These tools help us lift and move and cut and shape. Only quite recently, for the most part, have we developed tools to aid our minds as well.

(4) The tools of communication, from pencil and paper to television, are designed to serve our minds. These devices transmit information or preserve it, but they do not modify it in any way (If the information is modified, this is considered a defect rather than a virtue, as when a defective radio distorts the music we're trying to hear.)

(5) Our interest lies with machines that classify and modify information rather than merely transmitting it or preserving it. The machines that do this are the computers and the calculators, the so-called mind tools. The widespread use of machines for information processing is a modern development. But simple examples of information-processing machines can be traced back to ancient times. The following are some of the more important forerunners of the computer.

(6) The Abacus. The abacus is the counting frame that was the most widely used device for doing arithmetic in ancient times and whose use persisted into modern times in the Orient. Early versions of the abacus consisted of a board with grooves in which pebbles could slide. The Latin word for pebbles is calculus, from which we get the words abacus and calculate.

(7) Mechanical Calculators. In the seventeenth century, calculators more sophisticated than the abacus began to appear. Although a number of people contributed to their development, Blaise Pascal (French mathematician and philosopher) and Wilhelm von Leibniz (German

mathematician, philosopher, and diplomat) usually are singled out as pioneers. The calculators Pascal and Leibniz built were unreliable, since the mechanical technology of the time was not capable of manufacturing the parts with sufficient precision. As manufacturing techniques improved, mechanical calculators eventually were perfected; they were used widely until they were replaced by electronic calculators in recent times.

(8) The Jacquard Loom. Until modern times, most information-processing machines were designed to do arithmetic. An outstanding exception, however, was Jacquard's automated loom, a machine designed not for hard figures but beautiful patterns. A Jacquard loom weaves cloth containing a decorative patterns; the woven pattern is controlled by punched cards. Changing the punched cards changes the pattern the loom weaves. Jacquard loom came into widespread use in the early nineteenth century, and their descendants are still used today. The Jacquard loom is the ancestor not only of modern automated machine tools but of the player piano as well.

EXERCISES

I. True or false

1. The strong will inherit the earth.
2. In the beginning was the abacus.
3. The forerunner of the computer is the mechanical calculator.
4. The punched card is still very important for computers today.
5. The calculators Pascal and Leibniz built were reliable.
6. The mechanical calculator could multiply and divide as well as add and subtract.
7. Babbage invented the Jacquard loom.
8. "Beware of programmers who carry screwdrivers".

II. Give synonyms to:

To aid, strength, to speculate, nothing more than, to lift, ancestors, to manufacture, to single out, precision, to perfect, in recent times, pattern, to develop, information-processing machine.

III. Give antonyms to:

Descendants, automated machine, exception, virtue, intelligence, to transmit, reliable, sufficient, in the early 10th century, in modern times.

Pre-reading Discussion

1. What are tools?
2. What was the first tool?
3. What helped ape-like creatures evolve into human beings?
4. What is technology?
5. What tools of communication do you know?
6. What machines classify and modify information?
7. What do you know about Babbage, Pascal, Leibniz, and Jacquard?

Task 4

This is the summary of the section. Render it in English

THE FIRST HACKERS"

(1) The first "hackers" were students at the Massachusetts Institute of Technology (MIT) who belonged to the TMRC (Tech Model Railroad Club). Some of the members really built model trains. But many were more interested in the wires and circuits underneath the track platform. Spending hours at TMRC creating better circuitry was called "a mere hack." Those members who were interested in creating innovative, stylistic, and technically clever circuits called themselves (with pride) hackers.

(2) During the spring of 1959, a new course was offered at MIT, a freshman programming class. Soon the hackers of the railroad club were spending days, hours, and nights hacking away at their computer, an IBM 704. Instead of creating a better circuit, their hack became creating faster, more efficient program - with the least

number of lines of code. Eventually they formed a group and created the first set of hacker's rules, called the Hacker's Ethic.

(3) Steven Levy, in his book Hackers, presented the rules:

Rule 1: Access to computers - and anything, which might teach you, something about the way the world works - should be unlimited and total.

Rule 2: All information should be free.

Rule 3: Mistrust authority - promote decentralization.

Rule 4: Hackers should be judged by their hacking, not bogus criteria such as degrees, race, or position.

Rule 5: You can create art and beauty on a computer.

Rule 6: Computers can change your life for the better.

(4) These rules made programming at MIT's Artificial Intelligence Laboratory a challenging, all encompassing endeavor. Just for the exhilaration of programming, students in the AI Lab would write a new program to perform even the smallest tasks. The program would be made available to others who would try to perform the same task with fewer instructions. The act of making the computer work more elegantly was, to a bonafide hacker, awe-inspiring.

(5) Hackers were given free reign on the computer by two AI Lab professors, "Uncle" John McCarthy and Marvin Minsky, who realized that hacking created new insights. Over the years, the AI Lab created many innovations: LIFE, a game about survival; LISP, a new kind of programming language; the first computer chess game; The CAVE, the first computer adventure; and SPACEWAR, the first video game.

Task 5

This is the summary of the section. Render it in English

COMPUTER CRIMES"

(1) More and more, the operations of our businesses, governments, and financial institutions are controlled by information that exists only inside computer memories. Anyone clever enough to modify this information for his own purposes can reap substantial rewards. Even worse, a number of people who have done this and been caught at it have managed to get away without punishment.

(2) These facts have not been lost on criminals or would-be criminals. A recent Stanford Research Institute study of computer abuse was based on 160 case histories, which probably are just the proverbial tip of the iceberg. After all, we only know about the unsuccessful crimes. How many successful ones have gone undetected is anybody's guess.

(3) Here are a few areas in which computer criminals have found the pickings all too easy.

(4) Banking. All but the smallest banks now keep their accounts on computer files. Someone who knows how to change the numbers in the files can transfer funds at will. For instance, one programmer was caught having the computer transfer funds from other people's accounts to his wife's checking account. Often, traditionally trained auditors don't know enough about the workings of computers to catch what is taking place right under their noses.

(5) Business. A company that uses computers extensively offers many opportunities to both dishonest employees and clever outsiders. For instance, a thief can have the computer ship the company's products to addresses of his own choosing. Or he can have it issue checks to him or his confederates for imaginary supplies or services. People have been caught doing both.

(6) Credit Cards. There is a trend toward using cards similar to credit cards to gain access to funds through cash-dispensing terminals. Yet, in the past, organized crime has used stolen or counterfeit credit cards to finance its operations. Banks that offer after-hours or remote banking through cash-dispensing terminals may find themselves unwillingly subsidizing organized crime.

(7) Theft of Information. Much personal information about individuals is now stored in computer files. An unauthorized person with access to this information could use it for blackmail. Also, confidential information about a company's products or operations can be stolen and sold to unscrupulous competitors. (One attempt at the latter came to light when the competitor turned out to be scrupulous and turned in the people who were trying to sell him stolen information.)

(8) Software Theft. The software for a computer system is often more expensive than the hardware. Yet this expensive software is all too easy to copy. Crooked computer experts have devised a variety of tricks for getting these expensive programs printed out, punched on cards, recorded on tape, or otherwise delivered into their hands. This crime has even been perpetrated from remote terminals that access the computer over the telephone.

(9) Theft of Time-Sharing Services. When the public is given access to a system, some members of the public often discover how to use the system in unauthorized ways. For example, there are the "phone freakers" who avoid long distance telephone charges by sending over their phones control signals that are identical to those used by the telephone company.

(10) Since time-sharing systems often are accessible to anyone who dials the right telephone number, they are subject to the same kinds of manipulation.

(11) Of course, most systems use account numbers and passwords to restrict access to authorized users. But unauthorized persons have proved to be adept at obtaining this information and using it for their own benefit. For instance, when a police computer system was demonstrated to a school class, a precocious student noted the access codes being used; later, all the student's teachers turned up on a list of wanted criminals.

(12) Perfect Crimes. It's easy for computer crimes to go undetected if no one checks up on what the computer is doing. But even if the crime is detected, the criminal may walk away not only unpunished but with a glowing recommendation from his former employers.

(13) Of course, we have no statistics on crimes that go undetected. But it's unsettling to note how many of the crimes we do know about were detected by accident, not by systematic audits or other security procedures. The computer criminals who have been caught may have been the victims of uncommonly bad luck.

(14) For example, a certain keypunch operator complained of having to stay overtime to punch extra cards. Investigation revealed that the extra cards she was being asked to punch were for fraudulent transactions. In another case, disgruntled employees of the thief tipped off the company that was being robbed. An undercover narcotics agent stumbled on still another case. An employee was selling the company's merchandise on the side and using the computer to get it shipped to the buyers. While negotiating for LSD, the narcotics agent was offered a good deal on a stereo!

(15) Unlike other embezzlers, who must leave the country, commit suicide, or go to jail, computer criminals sometimes brazen it out, demanding not only that they not be prosecuted but also that they be given good recommendations and perhaps other benefits, such as severance pay. All too often, their demands have been met.

(16) Why? Because company executives are afraid of the bad publicity that would result if the public found out that their computer had been misused. They cringe at the thought of a criminal boasting in open court of how he juggled the most confidential records right under the noses of the company's executives, accountants, and security staff. And so another computer criminal departs with just the recommendations he needs to continue his exploits elsewhere.

Task 6

This is the summary of the section. Render it in English

Computers

Computer is an electronic device that can receive a set of instructions called program and then carry out them. The modern world of high technology could not be possible without computers. Different types and sizes of computers find uses throughout our society. They are used for the storage and handling of data, secret governmental files, information about banking transactions and so on.

Computers have opened up a new era in manufacturing and they have enhanced modern communication systems. They are essential tools in almost every field of research, from constructing models of the universe to producing tomorrow's weather reports. Using of different databases and computer networks make available a great variety of information sources.

There are two main types of computers, analog and digital, although the term computer is often used to mean only the digital type, because this type of computer is widely used today. That is why I am going to tell you about digital computers.

Everything that a digital computer does is based on one operation: the ability to determine: on or off, high voltage or low voltage or — in the case of numbers — 0 or 1 or do-called binary code. The speed at which the computer performs this simple act is called computer speed. Computer speeds are measured in Hertz or cycles per second. A computer with a «clock speed» of 2000 MHz is a fairly representative microcomputer today. It is capable of executing 2000 million discrete operations per second. Nowadays microcomputers can perform from 800 to over 3000 million operations per second and supercomputers used in research and defense applications attain speeds of many billions of cycles per second.

Digital computer speed and calculating power are further enhanced by the amount of data handled during each cycle. Except two main types of computers, analog and digital there are eight generations of digital computers or processing units. The first generation was represented by processing unit Intel 8086.

The second generation central processing unit was represented by processing unit Intel 80286, used in IBM PC AT 286. The third generation is Intel 80386, used in IBM PC AT 386. The microprocessors of the fourth generation were used in computers IBM PC AT 486. There are also central processing units of the fifth generation, used in Intel Pentium 60 and Intel Pentium 66, central processing units of the sixth generation, used in computers Intel Pentium 75, 90,100 and 133. Few years ago appeared central processing units of seventh and eighth generations. They are much more powerful and can perform from 2000 to over 3000 million operations per second.

Task 7

This is the summary of the section. Render it in English

Cyberterrorism

Defined broadly, the term "computer crime" could reasonably include a wide variety of criminal offenses, activities, or issues. The potential scope is even larger when using the frequent companion or substitute term «computer-related crime." Given the pervasiveness of computers in everyday life, even in the lives of those who have never operated a computer, there is almost always some nontrivial nexus between crime and computers.

By the FBI's definition, cyberterrorism is well beyond the scope of this paper. With increasing frequency this term is being used by the mass media. Absent any evidence of activity, we'll leave it in the "eye of the beholder" to determine whether cyberterrorism is currently being deterred, is a phantom menace...or somewhere in between.

A key distinction between electronic civil disobedience and politicized hacking is anonymity. The motive for remaining secret is simple: the majority of politically motivated hacks are clearly illegal. Most institutions recognize that breaking into an opponent's computer and adding, changing or deleting (HTML) code, even if it is juvenile graffiti, violates some other's rights. Attitudes and opinions begin to diverge markedly around this point however. One person's activist is another's terrorist.

"A lot of groups are claiming that they're hacking into sites for a higher moral purpose, but they're hiding beyond anonymity or pseudonymity. Taking responsibility is not something we see happening."

At the heart of this discussion is the question of motive. Opinions differ just as much within the hacker community as outside over the efficacy of certain actions. The spate of (zombie) DDoS attacks against prominent e-commerce sites that occurred in February 2000 sparked a debate between two prominent hacker collectives. The Electro hippies Collective claims the Internet as a public space liable to be used by groups and individuals as a means of protest. As activists, they admit no practical difference between how cyberspace and the street are used by society.

Recent actions on the Internet against e-commerce sites represent a fundamental disagreement about the purposes of the Internet, and the increasing emphasis on the use of the 'Net as a vehicle for profitable trade rather than of knowledge and discussion.

The cDc says, the targeted sites were selected for their name recognition and prestige value, not for their commercial attributes or activities.

You may make yourself feel good and get a lot of attention, but when you crack a Web site, you are violating another person's rights. ...what does that mean? CRIME!

Task 8

This is the summary of the section. Render it in English

Computer games

Nowadays computer games gain more and more popularity all over the world, especially among teenagers, and get increasingly available. They are a comfortable and inexpensive sort of relaxation, rest and entertainment. It sometimes costs nothing at all: after downloading slot machines to your computer for free, you can test them even without access to the Internet. Those who are fond of those games, claim that they get lots of benefits from them. Their opponents, in turn, argue that youngsters should spend leisure time in a healthier manner, such as going in for sports. So let's try and comprehensibly discuss the given phenomenon, its advantages and disadvantages.

On the one hand, computer games help to develop memory. In fact, while playing you try to remember as much information as possible, which enables to achieve better results and eventually win the victory. They also enhance rapid reaction and improve motorics. Moreover, those games develop your logical thinking, computer skills and, last but not least, your command of the English language.

During a chat you can get acquainted with new people and make virtual friends. If you like each other, you date and consequently become close friends in the real life. On the other hand, computer games may negatively affect your health. First, your eyesight can deteriorate. Second, if you sit without moving for long periods, you may gain weight and run a risk of obesity. Addicted gamers tend to neglect regular meals and end up with junk food, thus harming their stomach.

Furthermore, numerous people spend too much time on playing, which can ruin human relationships. Another aspect is that such games include aggressive elements, which makes participants nervous and even cruel, causing violence and other forms of anti-social behaviour. To sum up, the issue in question has nearly as many strong points as weak ones. After all, everyone makes one's own decisions.

As to me, I prefer to spend evenings and weekends with my relatives and friends (real, not virtual ones!). Frankly speaking, from time to time I attempt to involve them into my favourite computer games, although the latter are far from being my only hobby.

Task 9

This is the summary of the section. Render it in English

Computer design

Computer is one of the inventions of the 20th century that changed the world greatly. The first computers of the 1940s were enormous. But now they are almost in every family and in every office building. Most machines do only one job, some are multifunctional (e.g. a TV set + DVD player). But no device is as multifunctional as computer. The parts of the machine (or its hardware) remain the same, you change only the program (software) and your computer immediately learns to do various things. A browser program is designed to look at pages on the Internet (you can also say to browse, things accounts for the word browser). A word processor program lets you to print text and then change styles of fonts and sizes of pages. A database program is used for searching and sorting records. Such program is used in shops, libraries, hospitals, accountant offices, and so on. They make work with great amounts of data much quicker.

Computers are found everywhere and used in every sphere of life. In a plant one can make a computer model of a car or plane and check its resistance to stress. Such calculations without a computer could have taken several months. Computer is used at school: children watch films, presentations and web pages. This helps them to study effectively. Computers also have some disadvantages. There is a famous joke that computers are designed to solve problems but half of the time they are the problem. As computer is a complicated device, one small breakage may stop its work. Moreover, the equipment is soon out of date

Besides, there is a problem of compatibility. First of all, there are hardware devices which can't work with the old operating systems, such as a processor, a hard disk drive, a video card, etc. Then, there are programs which need more resources than computer actually has. Thirdly, computers become more and more complicated, and much effort is required to learn how to work with them. Fourthly, computer viruses cause a lot of trouble - they can spoil, remove or steal computer data, and every user knows it well from his experience.

And on top of all, computer is a multifunctional device, as we already know, so it can be used both to do work and to entertain oneself. Children often fall prey to computer and Internet: they play computer games, spend their free time chatting with friends on the Internet and doing practically nothing. This aspect can't be denied.

To crown it all, computer is a good device like many others, designed to help people. But it's our own free will that lets us use it in order not to waste time but to get best results.

Task 10

This is the summary of the section. Render it in English

Internet Addiction

Last week, in a private rehabilitation clinic outside Edinburgh, Leo Edwards, a sixteen-year-old schoolboy, was going through severe withdrawal symptoms. His body often shook violently and uncontrollably, and at mealtimes he regularly threw cups and plates around the dining room. The boy's addiction had nothing to do with alcohol, drugs, gambling or food. His problem was 'Net obsession'— an over-dependency on the Internet.

An international group of psychologists has recently suggested that anyone who surfs the Internet for long periods is clinically ill and needs medical treatment. According to their report, Internet addicts should be treated in the same way as alcoholics, drug addicts, compulsive gamblers and people with eating disorders.

Leo Edwards is not an isolated case. Russell Hopkins, aged fifteen, from Gateshead in north-east England, is a typical online addict.

Every day after school, and after dinner until three or four in the morning, he will be found in his room surfing the Net or playing computer games. By the end of the day he will have spent more than six hours online. Understandably, his parents are extremely worried. Not only has his school work suffered, but Russell's addiction has also destroyed his social life and his spare-time interests. For instance, he has just dropped out of his school's basketball team in order to spend more time at his computer. Instead of spending next weekend having a good time out with friends, he'll be spending it indoors surfing the Internet.

Russell has recently joined an Internet online support group. It may seem ironic that many of the support groups for Internet addicts are online but at least Russell has sought help. Not everyone does. Dr Ann Hoffman, who runs an online support group, says, "People don't realise that being online for more than four hours a day amounts to addiction and that they have a serious problem. I predict that the number of people who join online support groups will have risen dramatically within three years."

Грамматический тест для дифференцированного зачета

Вариант 1

1. He already ... the rule.
a. learns b. learned c. has learned
2. The rain ... half an hour ago.
a. has stopped b. stops c. stopped
3. When ... you see Mary? – I ... see her next week.
a. will b. would c. shall
4. By 8 o'clock yesterday I ... my homework.
a. was doing b. have done c. had done
5. When I ... Tom, he ... an ice cream.
a. meet, was eating b. met, was eating c. met ate
6. ... you ... this work by next Sunday?
a. will ... have done b. shall ... do c. will do
7. Where is Boris? – He ... chess with his friend.
a. plays b. is playing c. was playing
8. ... Kate ... well?
a. do ... sing b. does ... sing c. is ... singing
9. His father ... watching TV at the moment.
a. was not watching b. is not watching c. doesn't watch
10. ... you ... supper at 9 o'clock yesterday?
a. Were ... having b. Did ... have c. have had
11. He ... you for ages!
a. hasn't seen b. haven't seen c. didn't see
12. When ... the boss come tomorrow?
a. shall b. will c. does
13. When I ... home, Kate ... the piano
a. come; was playing b. came; was playing c. comes; is playing
14. Take your raincoat with you: it ... rain today
a. may b. can c. must
15. My friend asked me who ... the piano in the sitting room.
a. played b. plays c. was playing
16. Granny likes ... to sing songs.
a. him b. his c. he
17. A hare ... known to run very fast.
a. is b. are c. were
18. The coat ... last year is too small for me.
a. buying b. buy c. bought
19. The girl ... the book on the shelf is the new librarian.
a. put b. putting c. having put
20. I'm really looking forward to ... to New York.
a. go b. gone c. going
21. I knew my friend ... never ... to Washington.
a. had been b. has been c. have been

Вариант 2

1. I ... to bed early yesterday.
a. was going b. were going c. went
2. They ... at the station 2 hours ago.

- a. met b. meet c. will meet
3. When the teacher ... the door of the classroom, the pupils ... at their desks.
a. opened; was sitting b. opened; were sitting c. opens; were sitting
4. He ... just the window.
a. has opened b. have opened c. had opened
5. What ... you prepare for breakfast tomorrow?
a. will b. shall c. did
6. She always ... to the Altai Mountains to visit her relatives there.
a. go b. goes c. will go
7. I ... a suit now.
a. is wearing b. was wearing c. am wearing
8. By 9 o'clock yesterday grand mother ... the dishes.
a. had washed b. has washed c. will wash
9. I ... my homework by 10 o'clock tomorrow.
a. will do b. will be going c. will have done
10. ... you ever ... to Moscow ?
a. have ... been b. has ... been c. do ... been
11. What ... your brother ... now?
a. was ... doing b. am ... doing c. is ... doing
12. When ... you usually ... dinner?
a. do ... have b. did ... have c. does ... have
13. My friend ... me up at 8 o'clock yesterday.
a. is ringing b. was ringing c. were ringing
14. Must we hand in our compositions tomorrow? No, you ... not you may hand them in after Sunday.
a. should b. need c. must
15. I was sure he ... the letter.
a. posted b. posts c. had posted
16. I expect ... to send a letter.
a. them b. they c. their
17. Many new textbooks ... expected to be published soon.
a. was b. are c. is
18. Who is that boy ... his homework at that table.
a. do b. doing c. done
19. This is a house ... many years ago.
a. built b. building c. build
20. Jane Eyre was fond of ...
a. reader b. reading c. read
21. I thought that I ... my work at that time.
a. shall finish b. will finish c. should finish
